educational, informative  
**and great fun!**

# bugsnstuff

## meet the minibeasts!

**WORKSHOPS:** **bugsnstuff** was set up to give children and adults the opportunity to have contact with and learn more about, the creatures of the insect, amphibian and reptile world. Guy Tansley brings great enthusiasm and knowledge to his workshops all across the north east.

**SCHOOLS:** **bugsnstuff** offers a variety of workshops that fit in with KS1 and KS2 programmes such as mini-beasts, rainforests, habitats, adaptation and senses etc. During the workshops, children will be allowed to touch and hold some of the animals; being able to feel the exoskeleton of an insect and the sticky skin of a frog brings them closer to these amazing animals.

**EVENTS:** Enjoy a different experience in your local area! Guy finds these excellent places to teach and learn. Be amazed by the bug world! Try to spot the stick insect and mantis amongst the leaves, see giant tarantulas, insects, frogs, lizards and beetles. Guess the number of legs on a millipede and find out what a snake feels like! All this and more will be on display for your visitors to see.

**PARTIES AND GROUPS:** The rainforest in your own home! Discover the creatures that live there such as geckos, lizards and snakes. Meet giant toads, tree frogs, tarantulas and amazing insects! Children will be allowed to touch and hold some of the creatures, making it an exciting event to remember!

*Guy has DBS clearance and is appropriately insured.*
